
(a) moderate suction, $\chi\Pi' > 0$
(b) strong suction, $\Pi' < 0$
(c) Step convergence
$p - p_0$ (Pa)
compression $-\varepsilon_{zz}$ (10^{-3})
max error / pressure change
PT steps over the loading
exact rate equation
PT, 320 steps
PT without Bishop correction (320 steps)
explicit strain form
moderate, 2D
moderate, 3D
moderate, 2D without Bishop correction
strong, 2D
strong, 3D
strong, 2D without Bishop correction
slope −1
